Economy Spring, an MW Industries company, now offers rapid prototyping services. In an effort to provide additional value and superior service, Economy Spring recognizes the need to partner with our customers to accomplish speed-to-market goals. As a result, we have invested in additional equipment and personnel to bring a design to life in the matter of days for engineering review.

Economy Spring has the capability to prototype a range of medical, aerospace and industrial products including springs, wire forms, stamped components, tubes/needles, and even product assemblies. Our manufacturing expertise extends to a range of round material, shaped material and tube stock. Prototypes are available as early as 3-5 business days, depending on the complexity of the design and material availability.

RAPID PROTOTYPING SERVICE HIGHLIGHTS:

- Design and engineering assistance as well as manufacturing feedback
- In-house 3-D printing capabilities to print parts and soft tooling
- In-house EDM services
- In-house tool room
- Extensive range of product materials
- CAD/Solidworks supported models accepted
- No minimum quantity order
- No minimum fee
- Prototype products include: springs, wire forms, metal stampings, tubular components/needles, & related product assemblies

Economy Spring is ISO 9001:2008 certified and an FDA registered facility.
