Since 1983, Engineered Spring Products (ESP) has been the leader in the engineering and manufacture of a wide range of precision springs, tubing and wire forms, bow/leaf springs, extension springs, torsion springs, slip springs, disc springs/Belleville washers, and unique assemblies for the oil, gas, and energy markets.

Our thorough understanding of each customer’s applications, product specifications, and stringent quality assurance requirements, ensures that ESP provides engineered parts of superior quality that are competitively priced. Our engineering staff is available to assist with your spring design from concept through completion.

Empowering Innovation. Engineering Value.®

MATERIALS:
- Inconel®
- Elgiloy®
- MP35N®
- Titanium
- Stainless Steel
- Hastelloy®
- Music Wire
- Chrome Silicon
- Brass
- Beryllium Copper
- Monel
- Copper

PRODUCTS:
- Compression Springs
- Torsion Springs
- Extension Springs
- Belleville Washers / Disc Springs
- Coiled & Formed Tubing
- Flat/Bow / Leaf Springs
- Machined Components
- Specialized Spring Assemblies
- Custom Assemblies
- Wire Forms

CERTIFICATIONS:
ISO 9001:2008 • Mil-I-45208A • Mil-Std-45662 • ANSI/ASME SPPE-1 • ITAR Compliant
